DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04/01/2009 has been entered.
2. The Amendment filed by Applicant on 04/01/2009 has been entered.
3. The Second Declaration filed by Glenn C. Calhoun on 04/01/2009 has been entered.

Response to Amendment/Arguments

4. Applicant's amendment and arguments filed on 04/01/2009 have been fully considered and they are found persuasive.

5. The rejection of claims 1-22 and 24 under 35 U.S.C. 103(a) as being unpatentable over Chang et al., US 2003/0032352 A1 (hereinafter "Chang") is withdrawn.

Allowable Subject Matter/Reasons for Allowance

6. Claims 1-22 and 24 are allowed.

7. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Chang. Chang teaches a method of preparing an effective ion-sensitive or triggable cationic polymer suitable for use in flushable or water-dispersible personal care products. See Chang, ¶¶ 0015-0030. Chang further teaches that the cationic polymer can be prepared in mixed solvent solution of water and acetone. See Chang, ¶ 0026. Chang further teaches heating the solvent solution and mixing solvent solution with various cationic monomers and hydrophobic monomers under free radical conditions. See Chang, ¶¶ 0017-0028. Chang further teaches removal of excess solvent. See Chang, Examples 1-3.

8. Chang does not disclose in the specification or working examples a solvent recycling step. Based on the second Calhoun Declaration and the amendment to include a process of preparing

an aqueous dispersion, the recycling step is not merely an optimization of the process and step E and F are vital to preparing the aqueous dispersion.

9. In addition, the Applicant has provided data in the Declaration revealing the unexpected result as of completing steps E and F. The Examiner has entered and reviewed the Calhoun Declaration and found the arguments put forth and conclusions made in the Declaration to be convincing in that steps E and F are necessary.

10. As of the date of this Notice of Allowability, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Chang to render the present invention anticipated or obvious to one of ordinary skill in the art.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (571) 272-1102. The examiner can normally be reached on Mon-Thu, 10 AM - 8 PM.

13. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David W. Wu can be reached on (571) 273-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

14. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
